AAA Weigh, Inc. COVID-19 Response Letter

In accordance with the California “Stay at Home” order and the Los Angeles “Safer at Home” order, AAA Weigh will remain open as an essential business in support of critical industries such as medical facilities and supplies, critical manufacturing, government, food, agriculture, transportation, and supply chain and distribution support and services.

AAA Weigh has always valued safety as a top priority. In response to the COVID-19 crisis we have enacted enhanced cleaning procedures for our technicians and company and customer equipment that they work with. Technicians are also maintaining safe social distancing and wearing extra protective equipment. Field technicians have printed badges identifying them as essential workers and they have the California code defining essential workers printed and in their clipboard with their paperwork.

As AAA Weigh and our suppliers balance the needs of our customers and the health and safety of our organizations and communities, we appreciate your patience as certain lead times may be longer depending on the equipment or manufacturer. While some factories have production delays, others are fully stocked at this time and AAA Weigh currently has a large stock of equipment. As of now, we are operating a normal operating schedule of 8:00 am to 4:30pm, Monday through Friday at our San Fernando and Ventura locations. We are currently limiting in house traffic so please contact us prior to dropping off or picking up scales and equipment so we can update you on temporary procedures for drop off and will call.

Thank you for your business and support in these unprecedented times. We appreciate our business very much and look forward to serving your scale needs for many years to come. Stay safe.

Sincerely,

AAA Weigh, Inc.
