RoughDeck®

HP, HP-H, SS AND HE SERIES FLOOR SCALES

RoughDeck® is Simply the TOUGHEST, Most Accurate Floor Scale Available.

Harsh environments and demanding capacities are no match for the industry's toughest floor scale. RoughDeck lives up to its name with superior structural design, specialized footing, and durable load cell and cable protection. RoughDeck's design separates it from other floor scales by minimizing deck deflection and extraneous forces that could damage load cells. Standard or customized, the RoughDeck series is available in low-profile stationary and portable versions, and offers component interchangeability and alternative construction materials to meet specific industrial requirements—from basic shipping and receiving to highly corrosive or washdown environments.

TuffSeal Junction Box Protects Circuitry

Included with all models, the rugged, stainless steel TuffSeal junction boxes are specifically designed to protect sensitive circuitry. Its unique closure design prevents moisture access and a Gore™ breather vent helps equalize the pressure inside the enclosure which can be caused by sudden temperature or environmental changes.

Load Cell Mounting Plate

Localized deflection of the load cell is minimized by welding the mounting plate to the channel frame rather than the deck plate.

SUREFOOT™ For Accuracy

SUREFOOT decreases extraneous forces on the load cell, resulting in superior accuracy and repeatability. A stainless steel cup sits on the floor and is bonded by a pliable neoprene cushion to a stainless steel top plate with attached threaded stem, allowing the stem and top plate to move laterally and tilt independently of the bottom stainless steel cup.

Superior Structural Design

This design has proven so superior that RoughDeck carries a full five-year warranty on the deck structure.

Load Cell and Cable Protection

Load cells are recessed within the channels, and conduit lies within the channels to deter rodent damage and help protect components from rough handling.

The RoughDeck design minimizes deflection of the deck and feet for greater accuracy and repeatability with every weighment.

IT DOESN'T GET ANY TOUGHER THAN THIS

RoughDeck

Standard Features and Options

HP and HP-H

SS

HE

For non washdown environments

For corrosive, dry chemical environments

For harsh chemical or washdown environments

HP, HP-H, SS AND HE SERIES FLOOR SCALES

Any Application, Any Demand.

From 2' x 2' to 8' x 10', 500 lb to 30,000 lb, Rice Lake has a floor scale for any application and any demand. Need something custom-made? Rice Lake can build a RoughDeck in any size, any shape and any capacity.

Options

Installation options, whether in mild or stainless steel, add versatility to your RoughDeck.

- Digital weight indicators
- Indicator floor stand
- Floor anchor plates
- Pit frame
- Access ramps
- Bumper guards
- Portability frames

All installation options are available in mild or stainless steel.
